Attestation For Kika M2M: FCC ID: 2AEQM-KATALYST

To whom it may concern,

The following statements are accurate Each Signal Booster certificated under FCC ID: 2AEQM-KATALYST is manufactured and each booster is ensured to be FCC compliant:

(1) This consumer booster is not user programmable and does not require fine tuning or adjustments, or require professional installation. However, in a case the booster LED indicator light shows the need, the gain/power will self adjust as described in the User Manual. Such adjustments are built-in "failsafe", guards as they will not allow the booster to be non-compliant to NPS compliance or safeguard requirements.

(2) Future software upgrade will not cause non-compliance.

(3) NPS and other compliance/safeguard features cannot be field reconfigured, disabled, or removed and does not require professional installation.

(4) Licensee consent is not required for FCC certification equipment authorization purposes, but licensee consent does remain applicable per 20.21 provisions for both provider specific and wideband boosters.

(5) NPS and other compliance/safeguard features have been implemented. (3) NPS and other compliance/safeguard features are defaulted to be "On" (in operation).
